### OUR SPECIALTIES

*Superior Strains of*

**DELPHINIUM**

**LUPINS**

**AQUILEGIAS**

**PYRETHRUMS**

**AND OTHER HARDY PERENNIALS**

*Catalog of* **SEED, SEEDLINGS, PLANTS**  
**HARDY FERNS, NATIVE PLANTS**

*List of*  
**SEED, SEEDLINGS, and PLANTS**  
*of Superior Varieties,*  
*Mostly from English Growers Who Have*  
*Attained Great Perfection in Gardens*  
*and Flowers*

WE give no extended description, but depend on the reputation of the growers that all novelties and special strains are of superior merit.

Growing and watching the development of new and unusual flowers is a fascinating occupation. We would call especial attention to our strains of Delphiniums, Lupins, Pyrethrums, Aquilegias, and new and superior strains of many other plants.

We accept all orders subject to result of harvest with growers and to being unsold.

We give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter of any seed, seedlings, or plants that we send out.

Payment can be made by check, P.O. money order, or draft. Address all correspondence and make checks to the

**BROOK-IN-WOOD GARDENS**  
*Beverly, Mass.*

**PLEASE READ BEFORE ORDERING**

Early orders are advisable, as many of the items are scarce, and limited in number.

Much of the seed offered, particularly of the Alpine or Rock plants, comes from long distances and at irregular times.

We try to have the whole or greater part of the seed offered on hand by the first of the year. In filling orders for seed, we send items on hand and the balance as received from Europe. Our aim is to supply only fresh seed of the finest strains procurable, and all seedlings offered are grown from this same seed. It must be understood, though, that there is much variation in named varieties of many items grown from seed, particularly in named Delphiniums. Many of the resulting plants vary from the original, generally showing as good flowers as the original and often better, with a chance of getting some very unusual and lovely results. By ordering seedlings, patrons get rid of the trouble and risk of starting the seed. It also saves time. Make a bed in the vegetable garden and plant the hardy perennial seedlings a few inches apart, covering lightly with straw for the winter. They will then be ready to plant into permanent position in the spring, and at the cost of a few dollars you can have a large supply of plants of the finest sorts for your garden.

Prices by the 100. Seedlings priced \$1.50 for 25 are \$5 per 100; \$2 per 25 are \$7 per 100; \$2.50 per 25, \$8 per 100; \$3 per 25, \$9 per 100; \$3.50 per 25, \$10 per 100. All plants, three at dozen rates.

Hardy Perennials constitute the largest part of this list. Annuals and Tender plants are distinguished by a \*.

VIOLA PEDATA (Bird's-Foot Violet) .....	1.25
VIOLA PUBESCENS .....	1.50

People of refined taste always love ferns, and no garden is complete without its fern corner. They are fine for planting under trees, on shady banks and other places where grass will not grow. Also under pergolas, making lovely combination with lilies and shade-loving plants. A fern walk through the woods is a charming addition to any place.

We are experts in this line, and can tell you all about planting ferns, soil, location and care.

	Per 12
<b>ADIANTUM PEDATUM (Hardy Maiden Hair)</b> —Generally considered the loveliest of hardy ferns; 1-2 feet .....	\$2.50
<b>ASPIDIUM ACRISTICHOIDES (Shield Fern)—</b> A rich dark everygreen species .....	2.00
